

Mockito Hands-On Exercises

Exercise 1: Mocking and Stubbing

```
import static org.mockito.Mockito.*;
import static org.junit.jupiter.api.Assertions.assertEquals;
import org.junit.jupiter.api.Test;
import org.mockito.Mockito;

public class MyServiceTest {
    @Test
    public void testExternalApi() {
        ExternalApi mockApi = Mockito.mock(ExternalApi.class);
        when(mockApi.getData()).thenReturn("Mock Data");

        MyService service = new MyService(mockApi);

        String result = service.fetchData();

        assertEquals("Mock Data", result);
    }
}
```

Expected Output:
Test Passed Successfully
Returned Value: Mock Data

Exercise 2: Verifying Interactions

```
import static org.mockito.Mockito.*;
import org.junit.jupiter.api.Test;
import org.mockito.Mockito;

public class MyServiceTest {
    @Test
    public void testVerifyInteraction() {
        ExternalApi mockApi = Mockito.mock(ExternalApi.class);

        MyService service = new MyService(mockApi);
        service.fetchData();

        verify(mockApi).getData();
    }
}
```

Expected Output:
Test Passed Successfully
Verified: getData() was called once.
